TECH STACK

Languages

TypeScript, JavaScript, HTML5, CSS3, Rust

Frontend

React, Next.js, Zustand, React Query, Storybook, Styled-Components, Tailwind CSS

API Integration

GraphQL, REST

Testing

Jest, Cypress

Mobile

React Native, Expo

Backend

Node.js, Strapi, Payload, Prisma, Express, Nest.js

DevOps

Docker, Github Actions

Databases

MySQL, Sqlite

Platforms

Github, Bitbucket, Digital Ocean, Vercel

Tools

Figma, Adobe Illustrator, Webstorm, Photoshop

WORK EXPERIENCE

MPS

[Frontend Engineer]

MPS | Aug 2026 → Nov 2026 | London, UK

Worked within a cross-functional product team at Motion Picture Solution, translating Figma designs into React components for the next-generation KeyGen platform.

- Designed a feature-based frontend architecture to make the codebase easier to maintain and extend.
- Defined an MVVM-inspired architecture with TypeScript, Vite, React, Zustand, TanStack Query, and React Router.
- Built a reusable component library from Figma designs with React and Tailwind CSS, documented in Storybook.

IGDev

[Full-Stack Engineer]

Freelance | Mar 2025 → Aug 2026 | London, UK

Indie engineer delivering end-to-end solutions for multiple clients while re-establishing my professional brand after a career break.

- Redesigned and rebuilt my personal portfolio using TypeScript, Next.js, Tailwind CSS and Figma, improving performance, maintainability, and overall UI polish.
- Delivered a CMS-driven website in collaboration with a UI/UX designer using Strapi and Next.js, enabling structured content management and streamlined updates for the client.
- Built a reusable résumé-as-code system with react-pdf, centralizing personal content into a single source of truth for consistent, maintainable document generation.

IOG

[Frontend Engineer]

Input-Output | Apr 2022 → Apr 2024 | Baia Mare, RO

Worked within a cross-functional team in IOG's Atala Product Vision group to ideate, prototype, and validate strategic products and initiatives across the Hyperledger Identus ecosystem.

- Built the frontend for an enterprise DevOps tool supporting decentralized identity infrastructure using TypeScript, Vite, React, React Query, and Styled Components.
- Built a shared component library using Styled Components and Storybook, improving UI consistency and design-to-code alignment.
- Developed no-code verifiable credential tools for schema management, credential issuance, and verification using React, TypeScript, and modern frontend technologies.
- Developed React-based application demos to validate product concepts and align product direction within the team.
- Implemented the Atala PRISM landing page using Gatsby, React, and Styled Components, translating designs into a responsive and performant user experience.

LANGUAGES

- Romanian (native)
- English

- Created interactive Figma prototypes to accelerate early-stage product validation and collaboration.
- Contributed to wallet SDK development, improving integration workflows for SSI functionality.

FV

[Full-Stack Developer]

FinerVision | Feb 2020 → Feb 2022 | London, UK

Contributed to multiple client portfolio as part of a small Agile full-stack team, turning design requirements into responsive, accessible, cross-platform and animation-rich web and native applications.

- Built the Collect+ (PayPoint) website from the ground up using modern React-based architecture, delivering a fully responsive, production-ready client web platform.
- Built HSBC e-learning modules for embedded systems using React, TypeScript, and CSS3, delivering interactive enterprise training interfaces.
- Developed symptom-tracking mobile applications for Teva and Antiblanks using React Native, Expo, JavaScript, and TypeScript, focusing on usability and cross-platform reliability.
- Delivered seasonal RSVP-based websites for Sainsbury's and Habitat, supporting campaign-driven event workflows with fast turnaround delivery cycles.
- Owned and maintained legacy web and native applications, ensuring stability, continuous feature delivery, and production issue resolution.
- Built and maintained responsive cross-platform email templates for client campaigns, ensuring consistent rendering across major email clients and devices.
